CAREER OBJECTIVE

It is always man's knowledge that drives a company forward and it is this knowledge
I want to help develop the potential of.

QUALIFICATION SUMMARY

I got more than 20 years professional IT experience in telecom, hosting and Internet based
companys and has great skills and experience in Linux, UNIX, Windows, network technology
and cloud enviromets.

Over the years I work as solution / IT / cloud -architect, CTO, presales, teamleader, technical
project manager and of course pure technician. I got great experience and love to taking
responsibility and leading people to common goals!

Started to use Linux back in the early days (1995) and has worked with all most every major
Linux distributions like Debian, Red Hat, CentOS, Ubuntu, SUSE and Slackware. I am also
Red Hat Certified Engineer, RHCE.

My strength is that I am very creative, technically broad, focused and committed and always
try to see solutions instead of problems. Others see me as a positive and very social person
who is easy to create new and maintain existing contacts.
Love to be in the layer between the customers and the technology and to deliver solutions that
fit customers.
